**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Zalesski (5,912,542).

As recited in claim 1, Zalesski disclose a method for maintaining the power delivered by a motor including at least one phase coil, the method comprising the steps of: sensing a speed (23) of said motor as discussed in column 5, lines 33-34; and varying the inductance of said phase coil based on said sensed speed as discussed in column 3, lines 20-28 and lines 36-43; and column 5, lines 35-49 and as recited in claims 5 and 7.

As recited in claim 4, Imai et al. disclose the method, wherein the switching is carried out when said sensed speed reaches a reference speed (figures 1 and 4).

As recited in claim 5, Imai et al. disclose the method, wherein the switching is carried out when said sensed speed is about the speed at which saturation of a core of a phase coil of said motor occurs as discussed in column 4, lines 10-16 and column 5, lines 33-49.

***Allowable Subject Matter***

3. Claims 11 and 12 are allowed.
4. Claims 2, 6, and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

5. Applicant's arguments with respect to claims 1, 2, 4-7, 11, and 12 have been considered but are moot in view of the new ground(s) of rejection.
